Arthur is a European Patent Attorney who began his career in the energy industry. He worked in nuclear power generation and energy risk management before joining an intellectual property law firm where he began his training.

His industrial experience has given him a high degree of commercial acumen, which he applies when working with clients in fields including refrigeration, medical devices, sportswear, consumer products and computer implemented inventions in various fields.

Arthur provides advice to clients ranging from major U.S. technology companies to start-ups filing a patent application with a direct impact on the value of the business. He has experience in drafting and prosecuting patent applications, due diligence and infringement analysis.
