

European Oppositions

Haley Guiliano, through its registered European patent attorneys working in the U.S. and in the U.K., has represented clients in European proceedings before the Opposition Division, Technical Board of Appeals, and the Enlarged Board of Appeals. We have successfully defended numerous patents involved in ongoing litigation and licensing discussions. Our U.S.-based registered European patent attorneys are locally available to provide their expertise abroad.

How we can help:

- Represent clients—opponents or patent owners—in oppositions in the European Patent Office and appeals to the Technical Board.
- Coordinate opposition proceedings with clients' worldwide patent prosecution and litigation strategies.
