Haley Guiliano Announces 2025 Promotions

Haley Guiliano is pleased to announce its 2025 promotions of Associates [Jason S. Ingerman](#) from New York and Samuel Jinks of London to Counsel. Both Mr. Ingerman and Mr. Jinks are talented attorneys with deep technical capabilities who are known for their mentorship of junior associates.

“Jason approaches his work with a deep commitment to his clients and a practical mindset, making him both a trusted advisor and valued role model for, and mentor to, our more junior patent prosecutors.” remarked co-founding Partner James F. Haley, Jr. “His strategic thinking and meticulous attention to detail consistently yield results that align with his clients’ broader business goals.”

[Samuel Jinks](#) plays a key role in HG’s London office. Partner Andrew Hilton says, “Sam is a fundamental part of the HG London team. He adds real-world value to our clients’ portfolios and provides the energy for training the next generation of top-calibre HG attorneys.

ABOUT JASON INGERMAN:

Jason’s clients rely on him for insights into complex technological landscapes and strategic direction to protect and maximize their innovations. Since joining HG in 2017, Jason focused his practice on IP prosecution and rights management, leveraging his prior experience in patent litigation across diverse sectors, including electronics,

communications, and medical devices. Recently, Jason took on a significant role in HG's work within the semiconductor sector, contributing to the representation of industry leader Marvell. His hands-on approach ensures his clients receive tailored IP strategies aligned with their commercial objectives. Jason's blend of litigation, prosecution, and industry-specific expertise allows him to deliver results that drive value and secure his clients' competitive edge.

ABOUT SAMUEL JINKS:

Samuel Jinks is known for his ability to convert his technical expertise into practical insights which create positive outcomes for clients. A forward-thinking practitioner, Sam's background is rooted in his technical experience in the nuclear energy and aerospace industries, and also his valuable commercial experience as an in-house attorney at a major telecommunications company. Recently, Sam's enthusiasm for technology has led him to develop streamlined IP workflows for both HG and its clients, including utilizing artificial intelligence and analysis tools to enhance efficiency and results.
