Investing Where It Matters: HG Partners with Solve Intelligence

HG has built its reputation on delivering big law results with boutique law attention to detail by investing in what other firms struggle to scale: understanding nuanced client objectives, anticipating enforceability challenges, coordinating cross-border strategies, and delivering proactive counsel that strengthens portfolios before disputes arise.

This model thrives on direct partner involvement and sustained relationships – this means protecting how our practitioners spend their time. When efficiency creates space for strategic thinking, everyone wins. That's why we're excited to announce our expanded partnership with Solve Intelligence to optimize patent application drafts for selected clients through attorney-driven AI.

Technology That Amplifies Expertise

In the hands of seasoned practitioners, Solve Intelligence's platform handles standardized sections, terminological precision, and formatting with remarkable speed and accuracy. Solve's technology enables us to produce polished drafts while keeping attorneys and agents firmly in control—reviewing, refining, and applying the judgment that defines HG's work and that technology can't replicate.

"As a tech-forward practice, integrating Solve Intelligence into our workflows for selected clients maintains the same human-centric quality with AI optimization," said Sam Jinks, Counsel at HG.

"Solve's technology equips our team with sophisticated tools that free us to focus on strategic thinking and client relationships—increasing both capacity and consistency."

Built for Cross-Border Collaboration

HG's transatlantic practice demands seamless coordination between New York, San Jose, and London. Solve Intelligence creates workflow consistency across jurisdictions, for clients who choose it, without compromise to attorney judgment or client insight. The platform doesn't automate mediocrity, it removes obstacles to collaboration, freeing our teams for the sustained relationships and strategic conversations that matter.

What Clients Can Expect

Our clients choose HG for accessible counsel from practitioners who understand their technology and business. For selected clients, Solve Intelligence strengthens that promise by creating capacity for deeper engagement. With administrative work streamlined, our attorneys gain time for the proactive strategic thinking that distinguishes boutique firms from big law competitors.

Clients will experience the same tailored advice and direct partner involvement they've always received, with greater responsiveness and enhanced capacity for forward-thinking counsel that strengthens IP portfolios before challenges emerge.

A Philosophy Aligned with Excellence

HG invests in efficiency to protect relationships. We believe exceptional IP work comes from sustained client partnerships and deep technical expertise. We avoid big law's costs and departmentalization while overcoming boutique capacity constraints through strategic investment in people, processes, and tools.

Our partnership with Solve Intelligence preserves the HG advantage: delivering defensible IP outcomes through collaboration and technical excellence.

About Solve Intelligence:

Solve Intelligence is an AI-powered platform designed specifically for patent prosecution, enabling law firms to streamline patent application drafting while maintaining attorney control and strategic judgment. Built by patent practitioners for patent practitioners, Solve's technology handles standardized sections, terminological precision, and formatting with speed and accuracy, creating capacity for attorneys to focus on high-value strategic work. The platform supports seamless collaboration across jurisdictions and integrates into existing workflows, allowing firms to enhance efficiency without compromising the human expertise that defines exceptional IP practice.
