Joel brings a multidisciplinary lens and research experience in physics, soft matter and bio-nanophysics to his work as a Technical Advisor at Haley Guiliano. Working in the field since 2017, Joel has expertise in patent prosecution, patent drafting and target enhanced prosecution in technical fields ranging from telecommunications standards, chip architecture, medical devices and software-based inventions.

Joel is a member of the Chartered Institute of Patent Attorneys (CIPA) Informals committee, which represents the interests of U.K trainee patent attorneys. A former editor of CIPA's Yellow Sheet, he currently sits on the CIPA council, CIPA Education Committee and is actively involved in the Mercer Review.

Outside of work, Joel enjoys partaking in amateur dramatics — you can often find him in a community theatre's musical production or pantomime. In addition, he is an Examiner for the A-level Physics Paper 3 for the Cambridge Assessment board and holds memberships in the Institute of Physics, the Royal Institute and Mensa.
