111 North Market Street, Suite 900  
San Jose, CA 95113  
Main: 669-213-1050  
Fax: 669-500-7375

Matthew Placide started as a Technical Advisor at Haley Guiliano in 2020. A 2020 graduate of Santa Clara University, Matthew concentrated his studies within Electrical Engineering, including electromagnetics, circuit design, chip design, and software simulation. His senior thesis, Developing a Skin Phantom for the Testing of Biowearables, was an interdisciplinary project that built synthetic skin to mimic skin's electrical properties. Matthew's work experience consists of a summer internship at Design Visionaries in 2019, where he helped build a tool path on a jet engine lip for a client using computer-aided design software, Fanuc robot in NX 12. In addition, Matthew interned for GDS Link in the summer of 2018, where he was involved in building layouts for clients in a program called CASECenter using HTML and JavaScript.

### Related Practice Areas

- Patent Preparation and Prosecution

### Related Industries

- Computer Technology and Software
- Mechanical and Industrial Devices
- Electronic Hardware

### Publications

- Sutaria, K., Henderson, T., Lee, J., and Placide, M., "Developing a Skin Phantom for the Testing of Biowearables" (2020). *Interdisciplinary Design Senior Theses*. 63.

### Memberships

- National Society of Black Engineers
- Engineers Without Borders

### Education

- B.S.E.E., 2020, Santa Clara University
